VIJAYAKUMAR E

UX UI DESIGNER

I have diverse interest – architecture, design, culture, fashion, etc. and each field has its uniqueness. Nevertheless, all of those fields have a common characteristic – Problem of User. No matter whatever kind of product we are making, that product has to solve a problem for the user or improve some aspect of a user's life. The user is a significant factor when it comes to product. Therefore, I would like to concentrate my career more solving problems for users and designing solutions to enhance people's everyday lives and satisfy my interest.
